Carried unanimously.

GENERAL BUSINESS

Reference was made to a Special Meeting which was held to determine the legality of the new Foam Sandwich boats from the Faye mould that were found to not fit the template under the main beam

The meeting decided that the Boats from this mould would be exempt from measuring at this point but future boats from this mould would have to measure, if it was possible to repair the mould Peter Cobden & Philip Warren-Smith were going to check this out with Boyer Fibrecraft.

The boats in question all built 2004 that are exempt from this template are 1785, 1786, 1787, 1789, 1790, 1791, 1792. It must also be noted that the GUNNEL rounding on these boats do not measure as the radius is greater than 3mm & the beam radius is greater than 2mm. These changes have not been exempted. It was agreed that these changes would be carried out before the next National titles.

(NB 1788 is from a different mould) This will be recorded on their measurement form.

Meeting closed 9.40 p.m.
